

AIXM Management System

Viewer

You can upload the desired AIXM (Aeronautical Information Exchange Model) files for a 3D view on the map and promptly hide any file you don't want to show on the map.

You can access the properties of any point you click on the map.

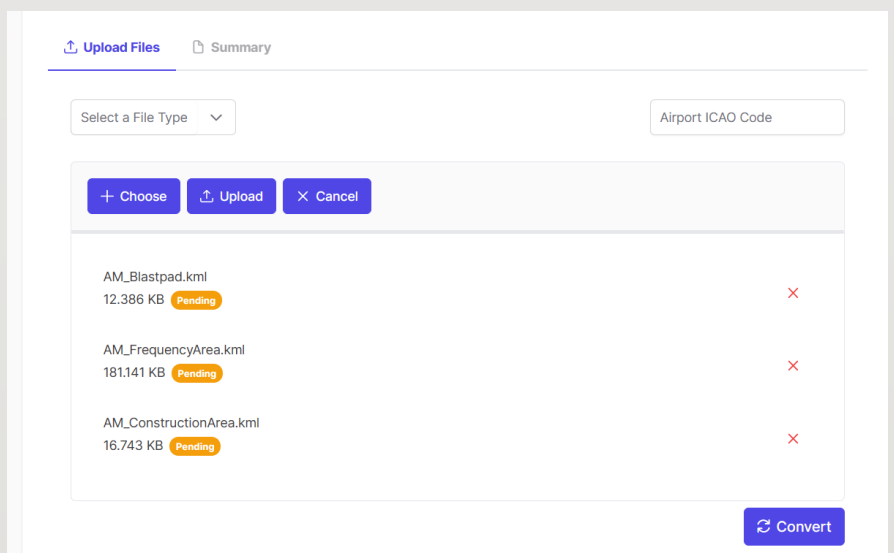

Metadata	
Name	Value
export_AM_AerodromeReferencePoint.xml	
MD_Metadata	
contact	
dateStamp	
DateTime	
Value	2023-04-28T00:00:00Z
referenceSystemInfo	

If your AIXM file has a metadata section, you can easily see its attributes and values in the table.

Converter

You can convert your AMDB, ASRN and eTOD data with .kml or .shp extensions, prepared according to ICAO, Eurocontrol and RTCA standards, to .xml data in AIXM format in accordance with the standards and then visualize them in 3D.
